Declaration on REACH Regulation (EU) No 1907/2006

Updated Candidate List: 14 June 2023

Dear Sir or Madam,

As a matter of principle steute products do not contain any substances from the candidate list (so-called „SVHC substances“) or exceed the permissible threshold values in the REACH Regulation. Our suppliers are obliged to inform us immediately if components/products do not meet the REACH requirements.

The sole exception is lead in quantities of more than 0.1Ma% in some copper and aluminium alloys used by steute. This means that we are obliged to notify our customers of the products concerned.

We hereby inform you that the products supplied by steute contain components in which lead (CAS number 7439-92-1) can be present in concentrations exceeding 0.1Ma% in accordance with Article 33 of the REACH Regulation.

The candidate list is regularly checked by steute for additions and amendments. If at any time we should find that our products require additional notification because of other SVHC substances in accordance with Art. 33, we will inform you concurrently.

If you have detailed questions on RoHS or REACH issues, please contact:

MaterialCompliance@steute.com

Best regards

steute Technologies GmbH & Co. KG
