

Declaration on RoHS Directives 2011/65/EU and 2015/863/EU

Dear Sir or Madam,

We hereby confirm that steute products conform to the Directives 2011/65/ EU and 2015/863/EU and do not contain any of the substances named in these directives above the stipulated threshold values.

This declaration is based on information provided by our suppliers to whom we have constant contact regarding substance restrictions, and who are obliged to only supply steute RoHS conform products.

For clarification, we would like to inform you that lead may be present in quantities of more than 0.1Ma% in some copper and aluminium alloys used by steute. As steute however does not exceed the threshold values of RoHS exemptions III, 6a, 6b and 6c for lead, all products – so-called – „monitoring and control instruments“ – can still be supplied as RoHS compliant.

If you have detailed questions on RoHS or REACH issues, please contact:

MaterialCompliance@steute.com

Best regards

steute Technologies GmbH & Co. KG
